Description

When viewing a page and editing using the inline icon a plugin changes are not saved.
(last one where it occurred : <https://doc.tiki.org/PluginToc>

Go to the page, check edit icon is enable.

Edit any of TOC plugin, do some change and save.

Nothing changes and if you re-open the edit dialog or edit the page it show like nothing was edited.

NOTE : If you edit the page, select the plugin, click on the "?" icon, select the plugin itself (like you want place a new one) you will see the same plugin editing dialog and changes there will be saved.

EDIT : I created an instance to reproduce and I couldn't. But I'm sure that it happen from time to time (and not only at Tiki.org) on different Tiki I worked on since Tiki 13.
