Description
      Plugin Add to Cart is used in conjunction with a tracker item (the product).

      In the tracker item we already have price and description however the Plugin Add to Cart need
      those field to be set manually. Extra maintenance and... dull 😃

      The Plugin Add to Cart should be able to use the product information.

Importance
      7

Easy to solve?
