Description
  When looking at version of the page the inline editing should be disable.

  To reproduce, go to https://tiki.org/tiki-pagehistory.php?page=Roundtable+Meeting+2017+04
  View a previous version (not the last one) on your screen.
  You are able to edit the convene plugin.
  This is wrong.

  Inline editing (any editing) should be disable.
  A warning (notice) should tell the user something like: "Editing is not permitted on previous version
  of a page. If you want to use this version and edit it, first rollback the page then you'll be able to edit
  it."

Solution
  Not relevant anymore
