Description

Tour plugins (Bootstrap Tour) work fine in Tiki 15 but in Tiki 16 and in branch 17 and trunk, the tour doesn't work. When the same code as in Tiki 15 is used in these later versions, nothing of the Tour displays. (The tour doesn't start.) There's no error message.

UPDATE: The tour works as expected in the show instance (trunk), so there must be some installation-specific problems both for the user who reported a problem (<https://tiki.org/forumthread65396>) and me in my local tests.

Solution

r62978 in 17.x?

Also absolutely fine for my local 17.x test which was migrated from a 15.x (or even older) install, will try and help debug what's up with your local one if i can later, but maybe this can be demoted to pending for now?

Does it work on any tiki sites? Did we ever have a demo (on doc for instance?)

luciash d' being 26 May 17 12:52 GMT-0000

My 17.x demo does not work either (if I got the syntax correct)...
<https://demo.luciash.eu/tiki17x/tiki-index.php?page=PluginTour>

luciash d' being 29 May 17 20:28 GMT-0000

My Chrome console yells this error:

Warning: Tour not initialized, the last step needs to have parameter next set to -1

I just copied the example from <https://doc.tiki.org/PluginTour>:

```
{TOUR(title="Welcome to the tour" prev="-1")}Here's the start of a tour.{TOUR}
```

Apparently that is not enough and the console hints the problem but should not that be reported to the user instead of failing silently?

When I add the last step though, it is still not working 😞 Console reports new error:

Uncaught TypeError: Failed to execute 'getComputedStyle' on 'Window': parameter 1 is not of type

'Element'. at getStyles (jquery.js:6083) at curCSS (jquery.js:6175) at Function.css (jquery.js:6520) at jquery.js:6646 at access (jquery.js:4013) at jQuery.fn.init.css (jquery.js:6628) at Popover.Tooltip.applyPlacement (bootstrap.js:1511) at Popover.Tooltip.show (bootstrap.js:1487) at HTMLSpanElement.<anonymous> (bootstrap.js:1867) at Function.each (jquery.js:362)

HTH,
luci

Gary Cunningham-Lee 05 Jun 17 08:28 GMT-0000

That's the same error message I get in Firefox. Any JavaScript bug fixers available?

Jonny Bradley 12 Jun 17 13:37 GMT-0000

Most odd - i copied that markup to a new page on the show instance here and it seems fine...

That's on trunk though - but it also works fine on my local 17 - weird...

Jonny Bradley 12 Jun 17 13:47 GMT-0000

Found it - it's the "Smarty template usage indicator" pref, seems bs tour gets confused by comments, might not be fixable in tiki...

Gary Cunningham-Lee 12 Jun 17 14:54 GMT-0000

Fixed in my local branch 17 and trunk 😊. Thanks, Jonny.
