Description

Hello,

When you want to create a form to embed a tracker you need to put the trackerId and the fields Id. I improved them in a more user friendly way in order to avoid to remember the ids.

Before:

After:

I have uploaded the files modified.

The modified files are:

- lib/wiki-plugins/wikiplugin_tracker.php
- lib/jquery_tiki/tiki-trackers.js
- lib/jquery_tiki/tiki-jquery.js
- lib/tiki-js.js

You will found the modified code tagged inside
// NOTE: Start Modification
.....code....
//NOTE: End Modification

Hi Andres

17.x has this already i think, but you can code? If so welcome! 🇹🇲
Maybe we can find the commit(s) and you could backport it/them?
Let's meet on IRC sometime to get you set up (but not now, i need food ;)

Marc Laporte 08 Aug 17 10:56 GMT-0000

On a site, I noticed field picking was there, but not for pop-up .

Also, sometimes, order is important. I don't think current interface lets us re-order
