The metatag description bug is taking a toll on SEO rankings and people who are using Tiki are considering other CMSs due to this. How long will we have a bug such as this in LTS version?

Marc Laporte 08 Aug 17 03:38 GMT-0000

Hi Niel!

Can you fix it? Can you find someone using one of your sites to step up? Can you hire a developer?

We need more & different people to help out.

Best regards,

M ;-)

Niel Hirjee 09 Aug 17 10:38 GMT-0000

I would like to have a go at it. can you kindly send me the licence keys so that i can setup a dev environment? thanks.

Marc Laporte 09 Aug 17 18:34 GMT-0000

ok, I made a request on your behalf

Niel Hirjee 10 Aug 17 06:38 GMT-0000

Thank you Marc. I have retrieved the keys and have the dev environment in place. More on IRC.
