Description

When a mandatory field like a title is multilingual if you fail to enter a value in all languages the form submits with a hidden error and fails to create the item or show why

I do not see that fail in 18.x - can you Jonny set a show instance pls?

Jonny Bradley 08 Dec 17 11:35 GMT-0000

Sure thing (had forgotten about this one, thanks ;)

Jonny Bradley 08 Dec 17 11:48 GMT-0000

Ok, done, it looks like the feedback is now fixed, but still there's no client-side validation for it happening, so 5/10, could try harder! 😊

Not sure if that means we should close this one?

luciash d' being 08 Dec 17 12:03 GMT-0000

Well it shows the error now or it warns user it could not be created in the ajax service so I would say close or rename the bug report?
