- 🟠 H5P Content Creation Bug

Description

"Create H5P" action in File Gallery no longer works in the newly released tiki17.0

The link should look like this: tiki-h5p-edit
but
The link is like this: tiki-index.php?controller=h5p&action=edit

I performed an SVN 17.1 on my instance and the issue was not resolved.

A show instance is created, and the error persist in the show.

Solution

Hopefully r63477?

Workaround

copy and paste tiki-h5p-edit at the end of your url, temp workaround but it works.
