### Description

I have set up a cron job ( `*/15 * * * * cd /var/www/...../web/tiki17x; php56 console.php scheduler:run` ) to run the console command on the server which checks the schedulers every 15 minutes but the defined scheduler task should be run every 2 hours, not each time the cron checks it. This is what I have there on the Scheduler control panel (the scheduler name is "Index rebuild every 2 hours"):

Index rebuild every 2 hours ConsoleCommandTask `*/2 * * * *` active 

(The ConsoleCommandTask is set up to i:r.)

Scheduler "Index rebuild every 2 hours" Logs:

I want to run the scheduled task every 2 hours as defined, not every 15 minutes I check if there are any new schedulers.
