### Description

Current feature Profiles in the Control Panels in Tiki searches profile names by category filters (15.x, etc).

Most profiles in profiles.t.o were reviewed in the last years and the suitable ones were added to the Profiles Wizard, in most cases, and added tags to them to facilitate the discovery of profiles that will let you learn how to master feature X or Y that you might be more interested in (e.g., trackers in general, plugin listexecute, spreadsheets, tracker field itemlink, mathematical calculation field, staging and approval, etc).

Searching profiles from within Tiki by tags (folksonomy-based search) is not yet possible. The interface is ready to search by categories (top-down approach, if the naming of the profile doesn't match your expectations, you will miss it probably). "Who knows that Barter\_Market will let you practice with itemslist tracker fields? or which profiles will let you learn how to use maps with tracker items? or with convene plugin? or with listexecute plugin? etc.

We currently allow the profiles control panel to search by profile name filtering by category matching the corresponding tiki version. We should allow that profiles control panel (and /or the

Profiles Wizard interface!) to search by tag name while filtering by the same category corresponding to the corresponding tiki version.

[https://profiles.tiki.org/tiki-browse\\_frehtags.php?tag=listexecute&category=18.x ...](https://profiles.tiki.org/tiki-browse_frehtags.php?tag=listexecute&category=18.x ...)

I tried once, but my php skills were not high enough, and didn't get the desired result. Anyone willing to give it a go? (it shouldn't be that difficult for a senior dev, I reckon)
