Hello Xavi,  
I am not sure what exactly you are referring to.  
A Masonry alike display of Profiles? Not bad, why not?

What I would be up to is a profile for a landing page that uses a Masonry / Isotope like display for articles, tracker items or arbitrary content per grid, optional either automatted content (like latest articles, last tracker item, newest blog post etc) or manually added content (this topic/category here and that topic/category there).

Please clarify ;-)  
Thx for bringing up the Masonry tpoic!

Regards,  
Torsten
