Description
    I have an image inserted using the wiki toolbar on a wiki page.
    The wiki page contain 18 {DIV()}.
    When I edit the plugin setting using the "edit icon" the new setting are not saved.

    Note: If I edit using the dialog from the help icon it work:

    1. go to edit page,
    2. select the content of the plugin
    3. go to help icon and select img

    If I reduce to 17 {DIV()} the direct plugin editing is working back. (check history v35,36,37 of the page on the instance)

    NOTE : During the same session I found out that I can't insert a quote plugin within divs (I can at the bottom of them) or I had also to remove a DIV (else it broke the display).

Solution
    I remember this issue was addressed. (else I'll reopen)
