Description

when I choose to "Upload a new version" of a "myfile.xls" I get this error:

PHP (5.6.31) ERROR (E_WARNING):

File: lib/filegals/filegallib.php

Line: 3430

Type: move_uploaded_file(/myfile.xls.tmp): failed to open stream: Permission denied

And at the top of the browser window it says:

Check that these paths exist and are writable by the web server: /tmp/phpaMyPJU /myfile.xls.tmp

1. notice the root level directory

2. notice the space before /file

This means `$prefs['tmpDir']` ("Temporary directory") is set to the empty string. That means `initlib::tempdir()` must return the empty string on your system. I changed `tempdir` in `r63862` and think this won't happen anymore in Tiki 18. If anyone can reproduce in Tiki 18, please say so and feel free to reopen the ticket.

Meanwhile, try setting the Temporary directory to `"/tmp"`.
