

.... other similar failed INSERT

Here is the tiki_score table definition that is currently in my 1.9.1 database (extracted from a mysqldump):

```
CREATE TABLE tiki_score (  
event varchar(40) NOT NULL default '',  
score int(11) NOT NULL default '0',  
expiration int(11) NOT NULL default '0',  
PRIMARY KEY (event)  
) TYPE=MyISAM;
```

Solution

columns are dropped later in the SQL script:

```
Command: #Added June 27th lfagundes, refactoring score to have static data in php instead of db  
alter table `tiki_score` drop description  
Message: Can't DROP 'description'. Check that column/key exists
```

```
Command: alter table `tiki_score` drop category  
Message: Can't DROP 'category'. Check that column/key exists
```

```
Command: alter table `tiki_score` drop ord  
Message: Can't DROP 'ord'. Check that column/key exists
```
