Description

On Tiki 18 alpha during the DB installation I have errors related to Kaltura.

```
INSERT INTO `tiki_secdb` (`filename`, `md5_value`, `tiki_version`)
VALUES('./vendor_bundled/vendor/kaltura/api-client-
library/library/Kaltura/Client/Plugin/AdminConsole/Service/ReportAdminService.php',
'a317425c77e8cdf2ce1048465dcb0bc', '18.0alpha') Duplicate entry
'a317425c77e8cdf2ce1048465dcb0bc-./vendor_bundled/vendor/kaltura' for key 'PRIMARY'
INSERT INTO `tiki_secdb` (`filename`, `md5_value`, `tiki_version`)
VALUES('./vendor_bundled/vendor/kaltura/api-client-
library/library/Kaltura/Client/Plugin/AdminConsole/Service/UiConfAdminService.php',
'a317425c77e8cdf2ce1048465dcb0bc', '18.0alpha') Duplicate entry
'a317425c77e8cdf2ce1048465dcb0bc-./vendor_bundled/vendor/kaltura' for key 'PRIMARY'
INSERT INTO `tiki_secdb` (`filename`, `md5_value`, `tiki_version`)
VALUES('./vendor_bundled/vendor/kaltura/api-client-
library/library/Kaltura/Client/Plugin/ContentDistribution/Service/ContentDistributionBatchService.php',
'a317425c77e8cdf2ce1048465dcb0bc', '18.0alpha') Duplicate entry
'a317425c77e8cdf2ce1048465dcb0bc-./vendor_bundled/vendor/kaltura' for key 'PRIMARY'
```

```
INSERT INTO `tiki_secdb` (`filename`, `md5_value`, `tiki_version`)
VALUES('./vendor_bundled/vendor/kaltura/api-client-
library/library/Kaltura/Client/Plugin/ContentDistribution/Service/TvComService.php',
'a317425c77e8cdf2ce1048465dcb0bc', '18.0alpha') Duplicate entry
'a317425c77e8cdf2ce1048465dcb0bc-./vendor_bundled/vendor/kaltura' for key 'PRIMARY'
```

Solution

This appeared because api-client-library, a library with long paths, was added since Tiki 17, but the actual bug is a mistaken primary key for tiki_secdb. The key only uses the first 100 characters of the filename column, which can cause conflicts between keys for different files.

To solve, the key should use the whole path. By the way, md5_value should not be part of the primary key.

On fresh install or upgrade?

Bernard Sfez / Tiki Specialist 08 Dec 17 06:51 GMT-0000

Fresh.

Tested twice on an empty db (tables deleted).

It is easy to miss the error message that said 4 sql queries failed after the db install (we were several people to test and only I looked at it).
<http://sourceforge.net/p/tikiwiki/code/64842> fix this using bootstrap colors.
