Description

When I create a tracker field that whose label is composed of special characters (@@@@) or using exotic language those characters are omitted. In case of multilingual (all characters are exotic) only the "Field Prefix" is used. This result is an error (no error message, it fail) to create more than one field.

Meaning if I have a prefix like "survey" and I create fields like :

שם משפחה

שם פרטי

etc...

They all will have the same permaname, "survey" and this is not possible/allowed so after the first one is created it will fail.

This is a regression as previously the permaname in such case was built up using the field id (ie: survey_f12). I created an instance and it is easy to reproduce.

1/ An error should be displayed in case of duplicate permaname (note about omitted chars)
2/ In case all the character of a label are omitted it will better to put back the id as it was on previous version

working on it.

Luis Henrique Fagundes 19 Jan 18 11:05 GMT-0000

Fixed in https://sourceforge.net/p/tikiwiki/code/65263.

I made the quickest solution, which is appending a random integer to permName. It's not as elegant as having the field Id, but it's much simpler way to fix as fieldId has not yet been defined when permName is generated.

Bernard Sfez / Tiki Specialist 21 Jan 18 09:40 GMT-0000

Thanks Luis, I confirm it works.

However it's gonna be painful when using a lots of fields in a template (smarty or pretty trackers). Wouldn't be possible to use a integer numbering that is not random ?

	Name: {survey_1001} First name: {survey_1002} Answer 1: {survey_1003} Answer

2:{survey_1004} Answer 3:{survey_1005} Answer 4:{survey_1006} Answer 5:{survey_1007}
Answer 6:{survey_1008} Answer 7:{survey_1008} etc

If it is needed we can work this out with 5 numbers.
The 2 first digit being random (first time) and the 3 last digit numbering.
IE; rr001

Tracker survey:
survey_75001
survey_75002
survey_75003

Tracker user:
users_46001
users_46002
users_46003

Tracker location (case there is no prefix):
92001
92002
92003

...

what you say ?

Bernard Sfez / Tiki Specialist 07 Feb 18 09:51 GMT-0000

I recall we discussed it but I don't recall how it ends. 😃
Was it improved or...?
