Description
On creating a group, group is created but a false error warning is displayed wrongly.

Check adding a group on the instance.

On Safari the error is different:

AJAX: error 0 (rejected) for URL: tiki-ajax_services.php?controller=group&action=new_group&modal=1

Solution
r65253 i hope

Tested, on a Tiki18 on a server it is fixed.
Still not on the instance but... I guess something with our instance system (may be not updated).

I close it, thanks Jonny.
