Hello,

Is that version 18 or really 1.8 ?

If 18, can you create an instance so someone can check quickly what is the issue.
If 1.8, I suggest you upgrade first to 18. 😃

ArthurT 13 Mar 18 08:34 GMT-0000

Thanks a lot for caring. Actually I am using 17.x. 18 is in dev. mode. The issue is that if I add "icon=" in the plugin command there is no reaction. I tried everything. With full path, extension and so on. Nothing happens there always is the original icon shown. How can I create an instance?

luciash d' being □ 13 Mar 18 09:26 GMT-0000

Hi,
choose the "Version" from the dropdown and click the "Create show.tiki.org instance" above.

luci

PS: I am not sure but I think nowadays the icons change depending on type of the remarksbox you choose (e.g. warning, tip, note etc.) but you are right the icon param was there and it should work: https://doc.tiki.org/PluginRemarksBox

ArthurT 14 Mar 18 09:50 GMT-0000

Thanks for advise. Since I am a newby I am not sure if I have doe it correctly. I changes the version in that tracker item above. If I click on "Accessing the Tiki instance that demonstrates this bug" I receive a warning of missing authority. Thus I didn't find another dropdown than in that tracker entry above. In that documentation https://doc.tiki.org/PluginRemarksBox an example calling the remark box with another icon will show the customer how it works and prove the developers if it works.

ArthurT 22 Mar 18 18:04 GMT-0000

icon parameter defintely doesn't work in REMARKSBOX plugin in version 18. Do I have to add something to officially claim the bug? Would be helpfull if somebody cares about. Shouldn't be a big issue but very helpfull if it works.

ArthurT 23 Mar 18 05:12 GMT-0000

By the way: You can see it not working on the Tiki documentatiuon page https://doc.tiki.org/PluginRemarksbox last examplte there.

Bernard Sfez / Tiki Specialist 23 Mar 18 06:04 GMT-0000

Hello Arthur,

I create an instance for you and confirm the custom icon is not working on the remarksbox.

I got to run but I hope it will be fixed soon (no promises, family week-end started here 😃)

Thanks a lot. The problem seems to be the block.remarksbox.php where you will not find a parameter "icon". Enjoy family 😃

ArthurT 03 Oct 18 15:27 GMT-0000

Now it works. Thanks for fixing the problem.
