### Description

At <https://tiki.org/Contact-Us> we have 2 fields with a regex validation.

Subject that is a text field where validation using a regex code is working.

Feedback that is a textarea using the same regex code (I know carriage return is missing I use the same pattern for comparison purpose) is not working even if entering a single english word.

An empty message error (orange background) is displayed and I can't submit the form.  
I removed it in the validation for now of course.

To reproduce: Go to <https://tiki.org/tracker24>, fields, edit Subject field.  
Copy regex pattern and set the same parameters to the Feedback field.  
Go to <https://tiki.org/Contact-Us> try...

### Solution

Fixed silently per test on : SVN (19.2svn): Thursday 23 May 2019 15:43:28 IDT- REV 70058
