Description

Minify JavaScript breaks codemirror in doc.t.o 18.x.

Once minify js is disabled in the performance control panel, syntax highlighting works again as expected.

I detected it comparing the settings in dev.t.o (where codemirror worked as expected) and doc.t.o (where it didn't; and codemirror modes dropdown, when attempting to change highlighter, showed "null").

HTH

Solution

I think this was fixed a couple of months ago by reverting to an older version of the minify library (needs sorting out for tiki 19 though)

Please confirm 😊

I confirm <https://doc.tiki.org/tiki-editpage.php?page=Tiki18> is running 18.x, minified, and CodeMirror is happy

Somewhat related: Ricardo did some commits too because of a conflict between CDN and minification. That was fixed on wikisuite.org also running 18.x

I asked Victor to take a look at <https://sourceforge.net/p/tikiwiki/code/65994>

So closing this
