Description

The duplicate footnote detection was lost at some point between Tiki 15 and tiki18.

For example

Lorem ipsum dolor sit amet, pede reiciendis cras sapien, varius neque consectetur tincidunt in ipsum, dui nec dis cras.{FOOTNOTE()}Wikipedia contributors. "George Nakashima." Wikipedia, The Free Encyclopedia. Wikipedia, The Free Encyclopedia, 3 Oct. 2017. Web.10 Oct. 2017{FOOTNOTE} Dui dapibus cras ligula, aliquam ligula. Sit eu euismod aliquam orci orci hendrerit, nullam morbi, et cursus, maecenas quisque blandit enim.{FOOTNOTE()}Wikipedia contributors. "George Nakashima." Wikipedia, The Free Encyclopedia. Wikipedia, The Free Encyclopedia, 3 Oct. 2017. Web.10 Oct. 2017{FOOTNOTE} Lacus sagittis dapibus sed, lorem lacus donec, fusce eros arcu rutrum adipiscing eget rutrum.

... displays:

Lorem ipsum dolor sit amet, pede reiciendis cras sapien, varius neque consectetur tincidunt in ipsum, dui nec dis cras.¹ Dui dapibus cras ligula, aliquam ligula. Sit eu euismod aliquam orci orci hendrerit, nullam morbi, et cursus, maecenas quisque blandit enim.² Lacus sagittis dapibus sed, lorem lacus donec, fusce eros arcu rutrum adipiscing eget rutrum.

While it should be recognised that both footnotes are the same footnote, they show up separately 😞

This is how a lot of users went around the issues of `sameas` before `sameastag` was introduced. This regression greaks sites upon upgrading to Tiki18.
