regression in .htaccess / route rules?

It used to work. It is SEFURL for this URL:

https://tiki.org/tiki-view_forum_thread.php?forumId=6&threadId=67074

There even is a perma-link in the bottom left of the forum post with "Link" label linking to <https://tiki.org/forumthread67074-Plugin-trackers-transaction-step-on-Tiki17-2> which returns the same error.

Other threads in that forum work though:

<https://tiki.org/forumthread68695-Email-configuration-woes>

So it must be that post specific thing?

What can be wrong with it?

Emojis?

It is unrelated. There are no emojis and non-SEFURL link loads that forum thread just fine:
