### Description

On the forum I see the post from a user with a question mark instead of the flag of his country:

I check in the folder img/flags we don't have (anymore ?) a flag for England.

Was it lost or user shouldn't be able to select England (and use United Kingdom)

(Brexit unexpected side effect ??? sorry hi hi hi)

It is also not possible to select England as your country in your user preferences because of this.

### Solution

We never had an english flag in Tiki, as far as my tiki source archives say. They go back to Tiki 1.10. There is no "English" choice in the *country selector* tracker field either. How did he do it?

Either someone adds one, or « user shouldn't be able to select England (and use United Kingdom) »
