Description

internal wiki links are not clickable nor converted to the absolute url counterparts in the pdf when the option to show links at the bottom is selected in the tiki admin panel.

Reproduced here:

<http://xavi-9794-6688.show2.tikiwiki.org/tiki-index.php?page=Tiki-Wiki-CMS-Groupware>
u: admin
p: 12345

Current code used in the show instance:

~~SVN (24.0vcs): Tuesday August 3, 2021 17:34:21 CEST - REV 78798 (InnoDB)~~

Upgraded today (server side) to latest 24.x branch: r79594 (Last Changed Date: 2022-01-22 14:46:09 +0100 - Sat, 22 Jan 2022)

In that page, there is an internal wiki link to HomePage:

((HomePage))

The user would expect to have that link converted in the pdf as a link to:
<http://xavi-9794-6688.show2.tikiwiki.org/tiki-index.php?page=HomePage>

but it's not converted to any link, it's just shown as simple standard text (with no indication that it refers to another page in that tiki site)

See the pdf produced by mpdf for instance here:

Tiki Wiki CMS Groupware(2) Without Remote Service To Export Images (using trunk from august 2021, r78798)

220123 Tiki Wiki CMS Groupware (using branch 24.x Jan 2022, r79594)
