Plugin Code parsing content | Tiki Wiki CMS Groupware :: Development

Plugin Code parsing content

Status
● Open

Subject
Plugin Code parsing content

Version
15.x
18.x

Category
• Conflict of two features (each works well independently)

Feature
Wiki Plugin (extends basic syntax)

Resolution status
New

Submitted by
EmmArrBee

Lastmod by

Rating
★★★★★★★★★★★★★★ (0)

Description
If the configuration option Wiki argument variable is enabled (default is disabled), then the plugin CODE is parsing variables such as {{page}}.

If Wiki argument variable is disabled, then {{page}} appears as expected.

I'd happily create a show instance but your system is showing

Show.tiki.org is not configured properly

The public/private keys configured to connect to show.tiki.org were not accepted. Please make sure you are using RSA keys. Thanks.

Importance
5

Demonstrate Bug
Please demonstrate your bug on show2.tikiwiki.org

Version: trunk ▼ Create show2.tikiwiki.org instance
In creating the show instance, I noticed that tiki comments are also being processed by the code plugin and hidden from view.
