Description

The first issue is that I received the notice to approve the plugin even though I already approved the plugin at the site after editing the page. This is a regression.

The second issue is that the email message is malformed. It says:

"Plugin html is pending approval on Shared_t_o_footer."

And the text "Shared_t_o_footer" is supposed to be a link to that page, but it isn't a link. What should be the URL is actually the data from the body of the plugin, that is, the entire wiki page content in this case.
