Description
I'm receiving warnings from Tiki Scheduler.

From: a Tiki admin email ?

Subject: "Scheduler "Batch Sync WO Status - SyncStatusECDEntered" was healed"

Body : "Scheduler "Batch Sync WO Status - SyncStatusECDEntered" is now marked as healed, since its running time is over minutes."

With that little information I have no clue which Tiki is trying to tell me something.
We should add information to the email like: url of the Tiki and Browser name.
I would add the date so I can copy/paste or forward easily the information.

Something else ?
