Description

Hi,

I am using hotwords on my Tiki and I am facing a problem. I'm not sure if it is a bug or a feature request but I would like some help to achieve what I want.

I have the following list of Hotwords:
Word > URL
Lift Mechanics > Lift Mechanic
Lift Mechanic > Lift Mechanic
lift > lift
lifts > lift
chair lift > chair lift
cabin lift > cabin lift

The problem is that "list" will conflict with words like "chair lift" and the following text is displayed in my Tiki:

A small lift,

:

" >cabin lift or a big detachable grip lift" >chair lift should do the job.
Instead of links to "cabin lift" and "chair lift".

Is there a way to make Hotwords with two words (chair lift) override single words (lift)? ANy other suggestion is welcome.

PS: I need both pages, "lift" and "cabin lift"

Thank you

Best regards,
Rémy
