Related-to

-  Incompatibilty between Find and tablesorter on tiki-listpages.php
-  tablesorter conflicts with the search module searching on pages (tiki-listpages.php)

Description

The "Find" button on tiki-listpages.php only, when clicked, causes some page reloading but no form appears. I didn't see an JavaScript errors reported.

Fix in : <https://sourceforge.net/p/tikiwiki/code/68787/>

Hey Gary,

I think the issue is that the button shouldnt display if there is no fields/form instead of the issue being that there is no form. there are situations where the form is not shown at all (like when tablesorter is used) but regardless if there is a form or not, the button is always there. so that why i modified the code to not display the button when that happens (the button would be useless anyway so..)

fix is for 19x but can be backported if you want.
