Description

TEsting plugin list and plugin pivottable in trunk at nextdev.t.o, I 've just seen these errors in pages that were using plugin list, or plugin pivottable, such as:

- <https://nextdev.tiki.org/Tiki16>

or

- <https://nextdev.tiki.org/Tiki18>

“

Error: Malformed search query: Parsing search query failed: "Field tracker_id does not exist in the current index. If this is a tracker field, the proper syntax is tracker_field_tracker_id."

Error: Malformed search query: Parsing search query failed: "Field trackerId does not exist in the current index. If this is a tracker field, the proper syntax is tracker_field_trackerId."

Maybe it's just that the index is not run (or not finished successfully, or some related issue?)
Just in case, I drop this report.

I rebuilt the index and got:

PHP Notice: Undefined index: 709396090de8a9ff48dfa2a6c2b65f32 in /var/www/virtual/nextdev.tiki.org/html/lib/core/Perms/ResolverFactory/ObjectFactory.php on line 149

I conclude that re-index at the end of trim clone and upgrade needs to be looked at. I will ask Ricardo.
