Description

Several (all?) of my recent edits to Tiki18 page here in dev.t.o send me (user "xavi") to the dev.t.o homepage . That's new, it didn't happen to me months ago (nior in earlier tiki versions).
Regression?

Update: reproduced similar issue in trunk (from yesterday)

Solution

Structured pages on the top-level of the structure (i.e. without parents objects) were redirecting to an empty url. Now they redirect to the page url using the right structure record.
19.x: r67834
18.x: 67835
trunk: 67836

I saw this on a 19.x pre-dogfood server on one page, but not another (sorry, I didn't note which ones)

luciash d' being 30 Sep 18 08:30 GMT-0000

In my tests it happened only on pages which were put in a structure. Maybe only those which were the homepage of the structure themselves. (For some unknown reason to me there were actually many pages being the only one page in the structure of the same name as the page itself and no other pages in the structure assigned.)

Marc Laporte 03 Oct 18 15:26 GMT-0000

I wonder if this is related to [item6806-Alias-HomePage-link-already-present-in-5496-27-page-s-on-HomePage](#)

Jonny Bradley 03 Oct 18 18:53 GMT-0000

We need more info i think, i just successfully edited test as Xaxi and stayed on that page afterwards, so must be something else involved... (structure maybe, as Luci said)

Marc Laporte 03 Oct 18 21:40 GMT-0000

user marclaporte edited Tiki18, and ended up on the home page (/Development) but with the correct success message.

See image I just attached

<https://dev.tiki.org/Tiki18> is in a structure

Victor Emanouilov 04 Oct 18 09:49 GMT-0000

Solved this with r67834 in 19.x and backported to 18.x. Jonny, this was a result of smarty_function_sefurl used on a structured wiki page when the parent_id of the struct record was missing. Not sure why it is zero but the structured code in sefurl function was ignored in that case and we redirected to empty url - thus the Homepage. Fixed this by checking if structure_info actually exists before using the smarty function sefurl. This might be a bug inside structure handling code but at any case, we have a bunch of structured pages on dev site with zero parent_id, so I think we need the latest fix.

Marc Laporte 05 Oct 18 00:56 GMT-0000

I did svn up on <https://dev.tiki.org>
