Actually there's never been a blueberry theme option, as far as I know. I'm not sure what the purpose of the directory is. <https://12xthemes.tiki.org/Themes> shows no Blueberry theme option, for example. I think maybe the directory was created to hold images, etc. when no child theme is used, but I'm not sure.

luciash d' being 25 Sep 18 14:13 GMT-0000

Hmm, according to <https://branding.tiki.org/Colors#Primary> it was planned for info.tiki.org but I think it was never done and we ended up using Akebi (same as for the chat irc.tiki.org?)

Gary Cunningham-Lee 03 Oct 18 01:54 GMT-0000

Yes, so since the introduction of FiveAlive, there has only been a blueberry directory, but never any theme files created, so IMO this isn't a regression but just a continuation of the situation that always existed.

If there's a demand/need for a Blueberry option, it could be made based on the images in its directory and would probably only take a few hours but there's plenty of other contribution work on my list that's more urgent.

Marc Laporte 03 Oct 18 10:47 GMT-0000

ok, let's get rid of it and close this
