- ✖ Profiles and Profiles Wizard not working

Description

I've recently noticed that current trunk (r67636, soon to be 19.x) has Profiles Wizard feature fixed finally (yay, thanks to all those of you who made it possible!), but 18.x still shows spurious errors (for the end user experience) in the basic path to apply the featured profiles from the profiles wizard.

We need whichever fixes are needed in 18.x implemented in the LTS version of Tiki
Help!

Fixed, afaik,. even if profiles don't get loaded any more succesfully when coming from a link in the profiles wizard. Tested in 18.x and 20.x today again
