Description

I am not able to get a tracker to collect registration data.

I have followed the steps here: <https://doc.tiki.org/User-Tracker>

I get these errors upon registering an account:

NOTICE (E_NOTICE): Undefined variable: registrationTrackerId

At line 1205 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: itemId

At line 1207 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: newItemRate

At line 1208 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: fieldsfill

At line 1210 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: fieldsfillseparator

At line 1210 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: fill_line_cant

At line 1210 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: fill_flds

At line 1211 in lib/wiki-plugins/wikiplugin_tracker.php

NOTICE (E_NOTICE): Undefined variable: fill_flds_defaults

At line 1211 in lib/wiki-plugins/wikiplugin_tracker.php

ERROR (E_WARNING): array_filter() expects parameter 1 to be array, boolean given

At line 157 in lib/core/Tracker/Field/Location.php

When I'm viewing the tracker on the "List Tracker" page, the item count is shown correctly, but when I click on the tracker to view the information collected, it shows zero results.

The user page where the tracker information collected is also throwing php errors.

I tried this and I get the warnings but **not** the following final error even after adding a Location field in the User Tracker:

ERROR (E_WARNING): array_filter() expects parameter 1 to be array, boolean given
At line 157 in lib/core/Tracker/Field/Location.php

The warnings do not seem to be an issue, as the registration completes and the tracker data is saved properly. They could also be a pre-existing, and usually suppressed anyway. The final error I guess must be fixed now due to other fixes in the Location field?

Jonny Bradley 25 May 19 16:58 GMT-0000

I agree, warnings and notices shouldn't be breaking this, i think it's probably a configuration issue. Try setting the error reporting to be for admins only and retry. Also, i presume you are viewing the tracker list as admin? Maybe double check the tracker item permissions if not.

Jonny Bradley 25 May 19 17:00 GMT-0000

Also i see you created an 18.x show instance but it doesn't look like it's been set up (i set the admin password to 12345) - can you recreate this?
Thanks
