Isn't it how it always worked with the structures breadcrumbs?

I don't know for sure. I think I would have noticed before because it leads to empty pages.

usually related (at least in teh past) to same page in a structure belonging to another structure also. and no "Default structure" concept in Tiki or similar, so Tiki doesn't seem to know which structure to use for that toc, etc. It happens in plenty of places in doc.t.o (for years) afaik

hmmmmm, this page is in one real structure and one phantom structure...

Looks like we need Victor and Jonny
