Description

I get these notifications. on tiki-admin_toolbars.php. Im guessing its because our icons are missing in an updated version of font-awesome.

```
NOTICE (E_USER_NOTICE): Icon not found: monitor
At line 181 in lib/theme/iconsetlib.php
NOTICE (E_USER_NOTICE): Icon not found: monitor
At line 181 in lib/theme/iconsetlib.php
NOTICE (E_USER_NOTICE): Icon not found: dashboard

These can be fixed by updating the icon names in `base_files/iconsets/default.php` I suspect. I updated some already that were missing in the toolbars and will check into these also unless someone beats me to it.

Gary Cunningham-Lee 09 Oct 18 14:21 GMT-0000

There are no icon names like "monitor", "dashboard", or "shorten" in `themes/base_files/iconsets/default.php` (either a specific Font Awesome icon name or generic icon name. (The "legacy" font set does have a "dashboard" icon name, with id of "application_view_columns" which loads a table image.) I found (at <https://fontawesome.com/how-to-use/on-the-web/setup/upgrading-from-version-4>) a Font Awesome 4 icon "dashboard" that is "tachometer-alt" in FA5, so I added that to `default.php`, so maybe one of the missing icons is taken care of.

Hmm, I edited this comment and saved it, and the edit was lost.

I see on `tiki-admin_toolbars` where the "shorten" icon is missing but can't see a really good FA icon for it (checking <https://fontawesome.com/icons?d=gallery&c=arrows>) - would "crop" work (<https://fontawesome.com/icons/crop?style=solid>)? I'm not really sure of the meaning of "shorten" in the context of the editing toolbar.
