I rebooted.

I deleted all the indexes from Elasticsearch

I am reverting all sites to MariaDB full-text search

We'll lose Federated search and facets but it will be more stable. We can re-activate when we have a solution.

Is this still really an *open* issue? ES running out of memory and shutting down isn't really a Tiki bug imho.

It's certainly not a Tiki bug. It was categorized as dogfood on tiki.org sites before but I removed that category now because it was workarounded by Marc and not an issue here anymore. I will put it in Pending.
