Description
    I have a tracker A with items
    I have another tracker B with items with an itemLink field on tracker A items

    When I want to delete items from the tracer A using the "spanner → Delete" to the right end of the
    line it tells me how many other items from tracker B link to it and lets me suggest a replacement
    link. Then I can delete them all.

    Issues:

- no itemlinks are modified in tracker B
- The entry from tracker A is not deleted

    --
    I can't reproduce fully on show.tiki.org yet:
    I delete Item "Mrs. HHHHHH" from
    http://jyhem-9952-6871.show.tikiwiki.org/tiki-view_tracker.php?trackerId=2 while choosing to
    replace the occurence o
    It fails to delete

    I try to delete *Student: Bacc.* titem from

http://jyhem-9952-6871.show.tikiwiki.org/tiki-view_tracker.php?trackerId=1 (see attachment)
On step 2 (see attachment), I ask to replace the link to 'Student: Bacc. *with links to* 'Student: M.Sc.*.
Then I click on "Delete item".

It DOES change the link on
http://jyhem-9952-6871.show.tikiwiki.org/tiki-view_tracker_item.php?itemId=18 from Student: Bacc.
with links to 'Student: M.Sc.*, which is not the case on my production site...
It still fails to actually delete the item, but that was not the biggest issue (it can be deleted once
nothing links to it).

I'll try again.

-
After comparing the network queries from both sites, I feel the difference in behaviour is due to
having sefurl in the real site and not on show.tiki.org.

More interestingly, I got the same error message in both situations, so we do have something to fix.

drsassafras 26 Feb 20 16:48 GMT-0000

Closing due to inactivity. The issue may be reopened if it is still relevant.

Bernard Sfez / Tiki Specialist 19 Aug 20 18:30 GMT-0000

I just had the same and reopened this ticket.
Couldn't delete the linked item or reassign it to something 2 other similar link suggested.

Not having time to do better I restructured everything in mu Tiki to avoid being stuck but there is something not working properly and this ticket should stay open.

Jonny Bradley 20 Aug 20 08:35 GMT-0000

I've had this on my "so horrible i'll ignore it list'' for ages, along with quite a lot of corrupted client data, so we should try and fix this yes!
Thanks Bernard 😁
