Description

On a tracker, when using the tracker field text prepend it works fine using the plugin tracker and trackerlist but not when using the plugin list.

Without using format=trackerrender the content for prepend or append doesn't display in the plugin list.

IE : 16

Using format=trackerrender it will show the html code.

IE: 16hr

Using format=trackerrender and mode=raw it will show properly the append and prepend.

IE: 16hr

But the content for prepend and append is displayed with the default value.

IE: NAhr (NA is the default value).
