### Description

It is weird and no idea how to reproduce but on the page [https://doc.tiki.org/Changelog-1.8?page\\_ref\\_id=4088](https://doc.tiki.org/Changelog-1.8?page_ref_id=4088) the CODE plugin is ignored like if it was not enabled at all.

Maybe just too much content?

What is the limit for plugin content? I have increased the nested parsing from default 500 to 5000 value, but anyway, I am pretty sure it worked at that time of releasing Tiki 1.8 - is it possible it was unlimited back then?
