Subject
Content is displayed outside the remarksbox if I have a carriage return in a list

Version
19.x

Category
- Usability
- Feature request
- Consistency
- Conflict of two features (each works well independently)

Feature
Wiki Plugin (extends basic syntax)
Wiki Syntax (text area, parser, external wiki, etc)

Resolution status
New

Description
If the content of a remarksbox which is part of a list wiki syntax contains a line (carriage return) the part below it is displayed outside the remarksbox.
Plugin display

Workaround
I can use %%% to simulate a line break.
It is unlikely newbie users will think to do so.

I think it won't be fixed easily. There are certain rules in the wiki syntax parsing and the same would apply for example if you put it in a wiki table syntax. The table cells cannot contain line breaks as well so you need to use the "3 times %" syntax to do a line break there too. Not an easy fix to detect where you have the remarksbox put inside a list or table wiki syntax or where you have it outside. And not a regression.
