Description

Forum attachments used to work for me in the past.

This time, I tested using them again in a 19.x site on a clearos-based server, with extra php 7.1 added, etc (following documentation of wikisuite, etc)

I get error 500 when attempting to upload a small file (<100Kb) to a forum, either in db or file storage on disk. Folder at the server works for files uploaded to file galleries.

Error message:

```
[root@server user]# tail /var/opt/rh/rh-php71/log/php-fpm/www-error.log
  thrown in /var/www/virtual/example.org/html/lib/comments/commentslib.php on line 121
