Subject

Structure TOC Plugin breaks CKEditor

Version

19.x

Category

- Conflict of two features (each works well independently)

Feature

WYSIWYG (What You See is What You Get)

Resolution status

Fixed or Solved

Description

When the Structure TOC Plugin is activated, I can no longer edit pages in WYSIWYG mode. CKeditor sits and spins "Loading".

Errors produced:

```
/vendor_bundled/vendor/ckeditor/ckeditor/plugins/Tabledesmati%C3%A8res(Structure)/plugin.js?t=I8BH:1 Failed to load resource: the server responded with a status of 404 (Not Found)
```

```
ckeditor.js:248 Uncaught Error: CKEDITOR.resourceManager.load Resource name "Tabledesmatières(Structure)" was not found at "http://outilingua.net/vendor_bundled/vendor/ckeditor/ckeditor/plugins/Tabledesmatières(Structure)/plugin.js?t=I8BH".  
at window.CKEDITOR.window.CKEDITOR.dom.CKEDITOR.resourceManager.<anonymous> (ckeditor.js:248)  
at f (ckeditor.js:244)  
at Array.n (ckeditor.js:244)  
at r (ckeditor.js:244)  
at HTMLScriptElement.CKEDITOR.env.ie.d.$.onerror (ckeditor.js:245)
```

This occurred on two separate Tiki sites after upgrading from 18.2. I have no workaround as Structures are an important part of both sites for navigation.

Solution

Fixed in Tiki 20 (and probably in Tiki 19.1).

Are you saying that this bug was not in 18.2, or just that this may have appeared when you upgraded?
Does this happen if the interface is in English?
And does this persist in 19.1? This looks related with the issue reported in Adding FANCYTABLE
wikiplugin in toolbars prevents WYSIWYG editing.

Doug Higby 21 Aug 19 19:19 GMT-0000

I didn't check 19.1, but the issue is resolved in 20.0
