Description

I removed a page at doc.tiki.org and checked the box to make a redirect to another page whose name consists of three words. I wrote the page name normally with spaces, with no characters to represent spaces. When the redirect was created, it concatenated the page name's three words into one, so a long string with no spaces. This breaks the redirect.

Solution

Fixed in Trunk/Tiki 20: r.69356
19.x: r 69357

Hi **@Gary Cunningham-Lee**,

I'll try to tackle this.

Thanks
Roberto

Roberto Kirschbaum 04 Mar 19 16:21 GMT-0000

@Gary Cunningham-Lee,

I believe I fixed it.
In trunk: r.569356
In 19.x: r.69357

Can you please retest it when doc.tiki.org is updated to that revision number and confirm it's fixed?

Thanks
Roberto
