Rating

Related-to
- CSRF False positives
- Potential cross-site request forgery (CSRF) detected. Operation blocked. Required headers are missing.
- "The following mandatory fields are missing: Category" after anti-CSRF prompt
- Voting in a poll gives CSRF warning.

Description
I'm trying to add menu options and successfully added several, but trying to add another one I get a CSRF message and have to reload the page without the menu option being saved. So I can't make the complete menu.

I had two browsers accessing the site when I experienced this problem, which was happening in Firefox. I closed Firefox and continued in Vivaldi (chromium) and am not seeing the problem, so maybe the warnings were due to having two browsers accessing. I'll monitor this and close the bug report if it doesn't recur.

Hi Gary - is this still happening?
