### Description

I'm finding i need a consistent way of creating urls with a sefurl version of the title (usually) on tracker items, and i'm doing loads of title|replace:' ':'-' which leads to mess.

So i need to make smarty\_modifier\_slug() to do that as title|slug to obey the pref setting for it.

So just a reminder fo myself really, unless someone else wants to have a go! 😊

(don't forget about / chars )

### Solution

Added in r70072 for Tiki 20.0

### Importance

2

### Easy to solve?
