Description

Hello,

While trying to convert some blog posts to Tiki by using Markdown plugin I noticed several problems...First one is that when using quoted text, Tiki does not parse it properly.

Here is the text snippet:

-+Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Mauris pharetra et ultrices neque. Id consectetur purus ut faucibus pulvinar elementum integer enim. Sed euismod nisi porta lorem mollis. Dui nunc mattis enim ut tellus elementum sagittis vitae et. Porttitor eget dolor morbi non

arcu risus quis. Aliquam purus sit amet luctus venenatis lectus magna.
Ipsum suspendisse ultrices gravida dictum. In mollis nunc sed id semper
risus in. Arcu risus quis varius quam.

> Mattis rhoncus urna neque viverra justo nec. Aliquet nec ullamcorper
> sit amet. Sit amet venenatis urna cursus eget nunc. Maecenas accumsan
> lacus vel facilisis volutpat est. Consequat ac felis donec et. Aliquam
> vestibulum morbi blandit cursus risus at.

> A diam maecenas sed enim ut sem viverra. Consequat nisl vel pretium
> lectus. Ultricies integer quis auctor elit sed vulputate. Scelerisque
> in dictum non consectetur. Scelerisque eleifend donec pretium
> vulputate sapien nec sagittis aliquam.

A diam maecenas sed enim ut sem viverra. Consequat nisl vel pretium
lectus. Ultricies integer quis auctor elit sed vulputate. Scelerisque in
dictum non consectetur.+-

Here  you can see how does it look like.

Solution

change the line with `$converter = new CommonMarkConverter();`
to `$converter = new CommonMarkConverter(['html_input' => 'escape', 'allow_unsafe_links'
=> false]);`

Fix committed in <http://sourceforge.net/p/tikiwiki/code/70184>

Workaround

remove line with `$md = htmlentities($md); (UNSAFE!)`

Priority

Added a solution. Please note that Tiki does not highlight or format a blockquote in any visual way by default, so check the HTML source produced! (for some unknown — to me — reason)

> Added a solution.

So, with the solution, there is no more need to use Workaround?

> Please note that Tiki does not highlight or format a blockquote in any visual way by default, so check the HTML source produced! (for some unknown — to me — reason)

I see. Thank you very much for working on Markdown support in Tiki.

Btw, generated HTML source is quite strange.

Lucias d' being 10 Jun 19 16:27 GMT-0000

Yes, with the solution there is no more need for the workaround (in case of CommonMark).

You're welcome 😊 Feel free to support me 😊 by becoming my first patron here:

Good.

> You're welcome 😊 Feel free to support me wink by becoming my first patron

If I earn some bucks with Tiki, I'll seriously consider it. 😊 For now it's only non-profit work. 😊
