- ● dev.t.o: allowtableexpansion in PluginList fails while in PluginTrackerList works as expected + icon inconsistency

Description
If you access https://dev.tiki.org/Tiki20#Open_or_Pending_Blockers_and_Regressions , there's a button to Expand that Table. It doesn't work, as it used to until a few days ago. So navigation in the table becomes very difficult. If you turn off jqDoubleScroll then the feature works fine.
