Description
      plugin list filter by category doesn't seem to work on dev.t.o. Example: I dereived some list code
      from Tiki20 page towards jQuery Gantt editor page, adapting the filter condition to match categ id
      345:

      囗囗囗囗囗囗

      {filter content="5" field="tracker_id"} {filter
      field="tracker_status" content="o OR p"} {filter
      field="tracker_field_category" content="345"}

      There is at least one item linked to that category
      https://dev.tiki.org/item7122-Editing-a-Gantt-Chart-shows-missleading-messages-success-and-error

      But plugin list returns zero results.

      Am I doing something wrong? (I used to be able to write plugin list calls with filters and such). Some
      regression?

Workaround

Maybe the syntax changed to filter by categories? (but in that case, it should have been warned in the documentation pages about upgrading to version Y from version X)

It seems that if we replace this former syntax (which used to work fine, anyway):

⬜⬜⬜⬜⬜⬜

```
{filter field=&quot;tracker_field_category&quot; content=&quot;333&quot;}
```

with this other one:

⬜⬜⬜⬜⬜⬜

```
{filter categories=&quot;333&quot;}
```

then the filtering works again as expected, apparently. As reproduced here:
https://dev.tiki.org/tiki-pagehistory.php?page=H5P&newver=47&oldver=46
