Related-to

- Activity Stream doesn't display created or modified wiki pages

Description

Expose Action log data to the pivottable plugin. Some data can be seen through Activity Stream feature, but it seems it only allows to display tracker item events, and something related to socialnetworking.

I don't know whether this means exposing the action log data to the unified search index or not, but exposing the activity in the site to admins to easily review and visualize with some charts and summary tables what's going on would be very helpful.

So far, I did a quick proof of concept through R here:

<https://github.com/xavidp/rscripts/blob/master/Tiki%20R-view%20ActionLog.Rmd>
